

VORTEX AMBALAJ

SPEC SHEET

Tapes

Strong bonding, vibration damping.

Tapes

Strong bonding, vibration damping.

VORTEX industrial foam tapes are developed for strong bonding, vibration damping, gap-filling and sealing. High-performance adhesive technology and a durable foam structure deliver a reliable bond on metal, glass, plastic, wood and painted surfaces. With thickness, width and density options, they provide long-lasting solutions across automotive, white goods, electronics, signage, furniture and industrial production.

SCOPE

- + High adhesion performance
- + Single / double-sided application
- + Impact and vibration damping
- + Gap filling and sealing

APPLICATIONS

- + Automotive
- + White goods
- + Electronics
- + Furniture & signage

TECHNICAL DATA

SURFACES

Metal, glass, plastic, wood, painted

APPLICATION

Single / double-sided

OPTIONS

Thickness, width, density

PRODUCTION

Custom cutting on request

TAPES · PRODUCT FORMS

Foam Tape

Double-sided foam tape bonds dissimilar materials permanently: a conformable foam carrier absorbs surface irregularities while the high-tack adhesive holds fast. Its vibration- and impact-damping structure gives a clean, screw-free connection for automotive trim, signage, mirror and panel mounting, with high initial grab on metal, glass, plastic, wood and painted surfaces.

- Double-sided high tack
- Conforms to uneven surfaces
- Vibration and impact damping
- Screw-free, clean mounting
- Various thickness and width
- Automotive, signage and furniture

FOAM TAPE

Industrial Foam Tape

VORTEX industrial foam tapes are developed for strong bonding, vibration damping, gap-filling and sealing applications. High-performance adhesive technology and a durable foam structure deliver a reliable bond on metal, glass, plastic, wood and painted surfaces. With thickness, width and density options, they provide long-lasting solutions across automotive, white goods, electronics, signage, furniture and industrial production.

VORTEX

KÖPÜK BANT

Güçlü yapışma, titreşim sönümlerme ve sızdırmazlık için güvenilir çözüm.

- YÜKSEK YAPIŞMA
- DARBE VE TİTREŞİM SÖNÜMLEME
- BOŞLUK DOLDURMA
- SIZDIRMAZLIK
- ESNEK VE DAYANIKLI
- GENİŞ SICAKLIK DAYANIMI
- KOLAY UYGULAMA
- FARKLI ÖLÇÜ SEÇENEKLERİ

OTOMOTİV BEYAZ EŞYA ELEKTRONİK MOBİLYA

KORUMAYA DEĞER HER ŞEY İÇİN.
vortexambalaj.com

KEY FEATURES

- High adhesion performance
- Double-sided application options
- Impact and vibration damping
- Gap filling and sealing
- Flexible, durable foam structure
- Multiple thickness and width options
- Easy application
- Long service life

UYGULAMA

Tek / çift taraflı

YÜZEYLER

Metal, cam, plastik, ahşap, boyalı

SEÇENEKLER

Kalınlık, genişlik, yoğunluk

Pricing is project-specific — please request a quote.

TAPES · PRODUCT FORMS

EVA Foam Tape

EVA foam tape delivers superior sealing, vibration isolation and gap-filling performance thanks to its closed-cell structure and high density. Offered in various thicknesses and widths with single- or double-sided adhesive, it meets gasketing needs in glass, metal and profile assembly. Its moisture- and temperature-resistant build lasts indoors and out.

- Closed-cell EVA structure
- Sealing and gasketing
- Vibration and sound insulation
- Single / double-sided option
- Various thickness and width
- Moisture and temperature resistant

EVA FOAM TAPE

EVA Tape

VORTEX EVA tapes are engineered for industrial applications that demand strong adhesion, impact absorption, vibration damping and sealing. The high-density EVA foam structure tolerates surface irregularities, delivers long-lasting adhesion performance and provides reliable insulation against external factors. With options for thickness, width, density and adhesive, they are trusted across automotive, white goods, electronics, signage, furniture, construction and general industrial production. Custom-size cutting and production are available on request.

VORTEX

EVA BANT

Yüksek performanslı EVA köpük bantları; yapıştırma, sızdırmazlık, darbe emme ve titreşim sönümleme uygulamaları için ideal çözümdür.

- GÜÇLÜ YAPIŞMA
- DARBE VE TİTREŞİM SÖNÜMLEME
- SIZDIRMAZLIK SAĞLAR
- BÖŞLÜK DOLDURMA
- ESNEK VE DAYANIKLI
- GENİŞ SICAKLIK DAYANIMI
- KOLAY UYGULAMA
- FARKLI ÖLÇÜ SEÇENEKLERİ

KULLANIM ALANLARI

- OTOMOTİV
- BEYAZ EŞYA
- ELEKTRONİK
- REKLAM
- YAPI VE İNŞAAT
- ENDÜSTRİYEL ÜRETİM

KORUMAYA DEĞER HER ŞEY İÇİN.

TAPES · PRODUCT FORMS

Film Transfer Tape

Flat film (transfer) tape applies as a thin, virtually invisible adhesive film thanks to its slim, clear carrier. It's chosen where a foam carrier isn't wanted and a low profile with high clarity is required — lamination, labels, graphics and thin-panel bonding. On smooth surfaces it forms a strong, permanent, residue-free bond.

- Thin, low-profile film
- Clear, invisible bond
- Strong grip on smooth surfaces
- Lamination and graphics
- Residue-free application
- Label and thin-panel mounting

TAPES · PRODUCT FORMS

Mesh Tape

Mesh tape is a double-sided mounting tape with a scrim (net) carrier that tears cleanly by hand and grips strongly on both faces. It enables fast, clean installation in carpet, flooring, lamination and signage work, while the carrier mesh keeps the tape stable and dimensionally consistent. On even surfaces it forms a durable, flexible, high-strength bond.

- Scrim (net) carrier
- Tears easily by hand
- Strong double-sided adhesion
- Carpet and floor installation
- Lamination and signage
- Durable, flexible bond
